JWT WEBSOCKET CHAT APP

PulseChat

A secure real-time chat workspace for private messages, groups, media sharing, polls, and live presence.

Start chatting

Sign in

JWT

Secure sessions

STOMP

Live messaging

Groups

Team conversations

Built for full-stack real-time workflows

Everything the chat app already supports, presented from the first screen.

Private and group chat

Switch between direct conversations, managed groups, member roles, mentions, replies, and shared media.

Real-time presence

WebSocket events keep messages, typing states, online status, seen updates, and poll results moving instantly.

Account security

JWT authentication, email OTP verification, protected routes, refresh handling, and profile controls are built in.
